Varshini R
Yonah Selcy A

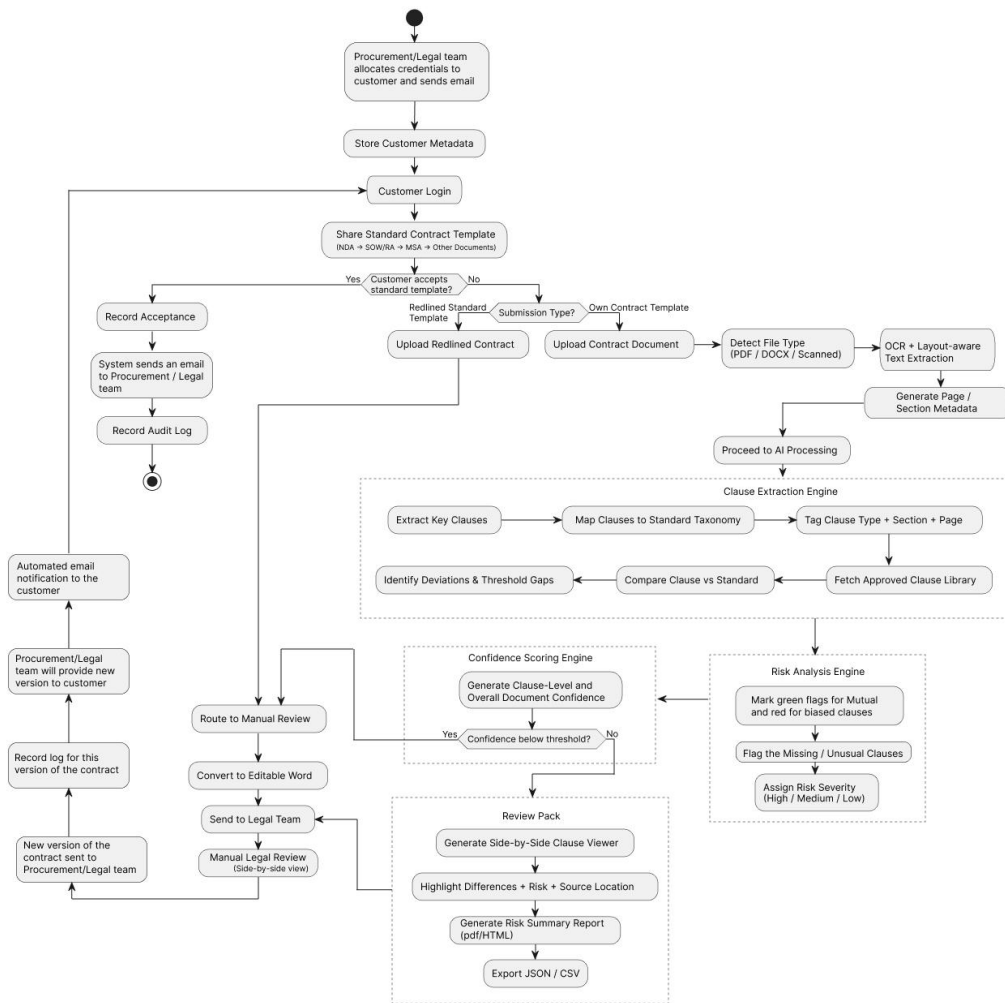

Requirements

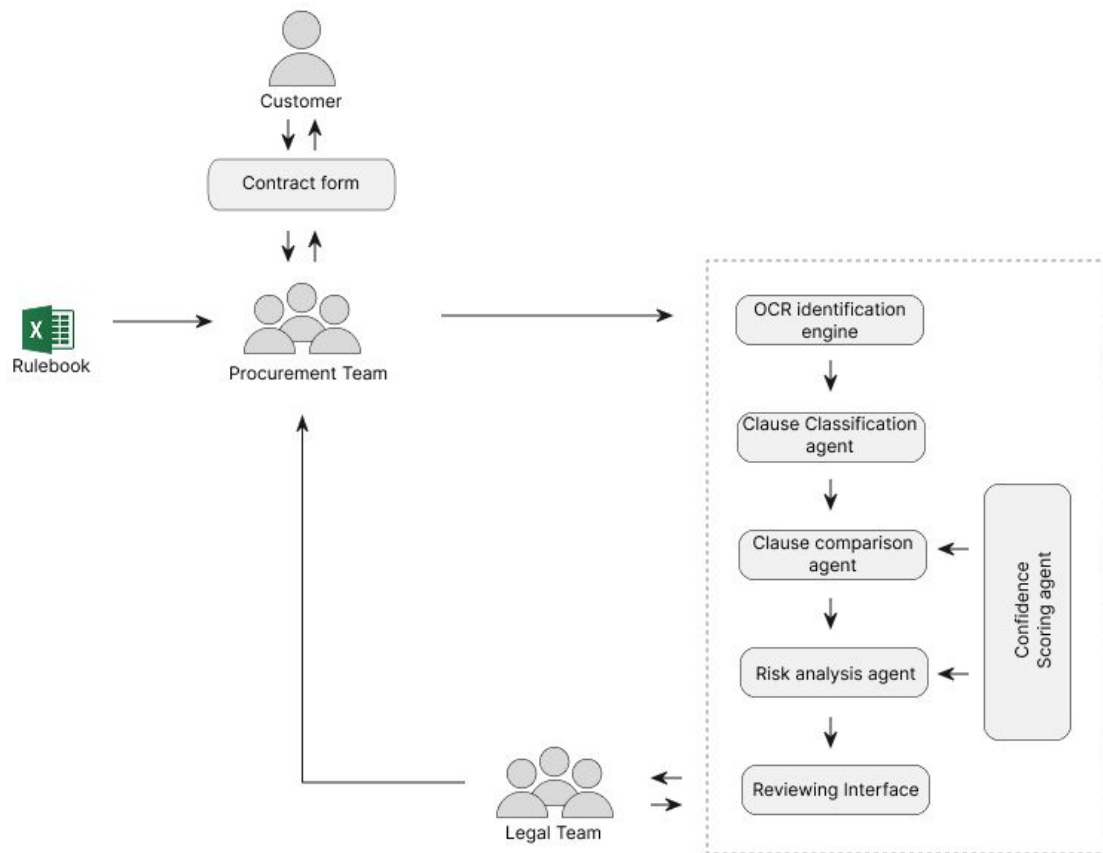

Functional Requirements	Non-Functional Requirements
● User Management and Role Based Access ● Contract Upload and Management ● Text Extraction and OCR ● Clause Extraction and Classification ● Clause Comparison ● Risk Analysis ● Side-by-Side Comparison View ● Reporting and Export	● Secure storage with encryption & audit logs ● Role-based access control ● Acceptable processing time for contracts ● Scalable for multiple users ● Clear, intuitive UI for legal teams ● Human-in-the-loop (no auto-approval decisions)

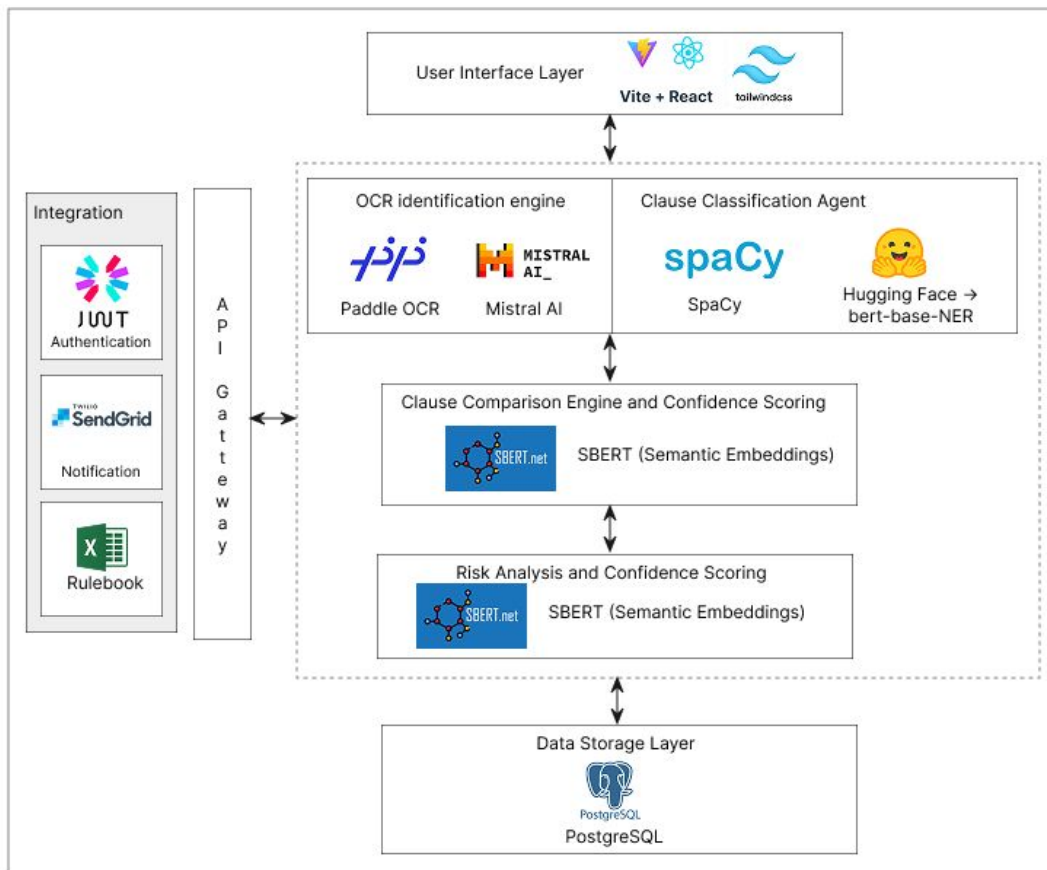

Workflow

Solution Architecture

Application Architecture

Roadmap

Define system flow, prepare data, and build base structure

- System Design
- Contract type definition
- Clause Definitions
- Risk Rules setup
- UI wireframes
- Initial documentations

Day 1-13

Build Intelligence to analyze contracts

- Clause extraction working
- OCR and text processing
- Risk detection
- Confidence scoring
- Side by side UI comparison

Day 14-27

Finalization and Delivery

- Audit logs and RBAC
- Editable document
- Risk validation
- Evaluation report
- Accuracy improvements
- Fully working system
- Final documentation

Day 28-40
